EDUCATION

Kavikulguru Institute of Science and Technology, Ramtek

Bachelor of Engineering – Information Technology | 2018 – 2022

- Specialized in software development, network systems, and database management.
 - Led academic projects, including a capstone on eCommerce platform development.
 - Actively participated in technical clubs and coding competitions.
-

PROJECTS

1. Online Registration for COVID-19 Vaccination

- Developed a web application to enable remote COVID-19 vaccination registration and scheduling.
- Implemented features for users to search nearby vaccination centers.
- Technologies Used: HTML, CSS, PHP, DBMS, MySQL

2. Face Mask Detection and Gender Detection

- Implemented a deep learning-based face mask detection system.
 - System detects faces and classifies them as 'With Mask' or 'Without Mask' using OpenCV and Keras.
 - Supports JPG, PNG images and real-time video processing.
 - Technologies Used: Python, Keras, OpenCV, C, Java
-

CERTIFICATIONS

- SAP Commerce Cloud Development (Valid until March 2023)
 - Agile Software Development
 - Responsible AI (Valid until April 2024)
 - JavaScript Basics (Valid until August 2023)
-

ACCOMPLISHMENTS

- Achievement for the successful completion of Build a Face Recognition Application using python as part of AI-For-India-Event.
- Successfully completed internship and projects at the THE SPARKS FOUNDATION.
- Participated in the Capgemini Tech Challenge 2021 Edition.
- Participated in Walmart CodeHers organised by Walmart Global Tech India.
